

Veterinary Nutritional Consulting

When your clients are looking for a more natural approach to their pet's health care. I can help!

Evelyn Kass-Williamson DVM holistic practitioner.

I have been using nutrition and supplements to effectively manage many chronic health conditions.

Let food be thy Medicine and Medicine be thy Food. ~ Hippocrates

The body has a tremendous ability to heal, if we will just allow it to do so.

Food as Medicine

I have researched many of the prepared pet foods for protein, carbohydrate, fat content and ingredient quality.

I have lists of foods appropriate for weight loss, diabetes, hyperlipidemia, cancer food allergies and intolerances, .

I can create a balanced homemade diet that is appropriate for the pet's condition.

The Holistic Approach

Our health is determined in part by genetics and in part by environment. It turns out that food, environment and lifestyle affect gene expression to turn genes on and off. What this means is that we are able to affect and improve 70-90% of our health challenges by changing lifestyle and diet. The same is true for our pets. Exercise, stress level, sleep, fun, environmental toxins and allergens, all affect our gene expression.

My goal is to help the patient heal, to resolve the underlying causes of the disease,
so it does not return

Veterinary Nutritional Consulting

Referral is Easy!

- *You keep your patients and provide them with an additional level of support.*
- *Patients will be sent back to you for all diagnostic testing and prescriptions.*
- *Records will be sent of all conversations within 24 hours so you are always aware of my recommendations.*
- *You collect all fees and keep an administrative fee of 15%. The remainder will be sent to me twice monthly.*

Package 1 \$99– 30 minute consult

This would be good for clients looking for diet or supplement recommendations for simple issues and preventive maintenance.

Package 2 \$399 –1 month of consultations and follow up

I will review the complete patient file, likely recommend further diagnostic testing as well as a full treatment plan.

This would be good for a patient with a complicated history, but a relatively simple problem, i.e. mild seasonal allergies that they want to manage while avoiding pharmaceuticals or an obese patient that has failed on prescription diets.

Package 3 \$1099 - 6 months of consultations and follow ups

I will review their complete patient file, likely recommend further diagnostic testing as well as a full treatment plan. Follow up testing will be done to evaluate progress and make treatment adjustments.

All Dogs
deserve
to be this
happy!

Testimonial

Dr. Williamson,

I want to thank you for all your endeavors & research towards helping Charlie's food allergies to get under control. I will make a note of All your recommendations for the future.

I see that this is going to be a slow process. I believe we are on the right track. Every day is a little better. He appears to be much happier and loves his New diet. I have been searching and experimenting for him for over 6 years with very temporary results. I'm relieved and excited to have you as part of his health program. We're looking forward to years of good health & longevity for Charlie.

My Sincerest gratitude for what you have done so far.

Thank you so much ,

Diana L Piscione
